Program Overview

Bachelor of Science (Honours) Accounting and Finance – Lancaster University

This dual degree in Accounting, Finance and Commerce is designed to provide students with a thorough grounding in theoretical and practical aspects of accounting and finance. Accounting is concerned with the provision of financial information for a variety of business purposes, including decision-making, planning and controlling activities, performance measurement, and external reporting.

Finance is concerned with financial decision-making, asset pricing, risk management, and the organisation and behaviour of financial markets.

Bachelor of Commerce – Deakin University

Deakin's Bachelor of Commerce is a degree for aspiring specialists who want to provide insights that drive decisions in accounting, finance, economics or marketing.

Delivered in Bandung through Deakin Lancaster Indonesia (DLI), a joint initiative between Deakin University, Lancaster University and Navitas, this globally connected program combines academic excellence with the advantage of an international education delivered in Indonesia. You will receive the same, high-quality education as students at Deakin and Lancaster's home campuses, with the added benefit of learning close to home.

Unlike standard commerce degrees, Deakin's program equips you with expertise in data analysis, reporting and technology to guide business, market and financial outcomes. You will learn to deliver strategic insights supported by data and specialist expertise that influence organisational decisions with confidence. Taught in English and delivered on a unique Bandung academic calendar, your studies will include Indonesian National Subjects alongside coursework from both universities.

Program Learning Outcomes

Bachelor of Science (Honours) Accounting and Finance – Lancaster University

By the end of this program students should have knowledge and understanding of:

- The methods available for, and the rules governing, the production of financial reports to be used by those outside the company;
- The methods available for the production of reports to be used by those managing the company;
- The fundamental concepts of finance and risk management and their application in the global marketplace;
- Quantitative techniques and skills with an appreciation of when and how they may be appropriately used;
- The tasks performed by the accounting profession, the methods employed in the workplace and the benefits they bring.

Students should also be able to:

- Locate, analyse and assimilate company information and data from various sources, both in paper and electronic form;
- Plan, structure and conduct individual and group assignments of both written and computational forms;
- Undertake computations of varying levels of complexity in financial accounting, management accounting and finance;
- Apply the use of information technology to the above tasks;
- General knowledge, understanding and skills.

By the end of the program students should be able to:

- Reason analytically and critically;
- Create linkages between the material covered in the various modules of the program;
- Rapidly assimilate facts and draw valid inferences;
- Communicate ideas effectively, both orally and in writing;
- Manage their time, and produce work by required deadlines;
- Work productively in groups;
- Work independently without requiring direct supervision.

Bachelor of Commerce – Deakin University

Deakin Graduate Learning Outcomes	**Program Learning Outcomes**
Discipline-specific knowledge and capabilities	Apply a broad and coherent theoretical and technical knowledge of commerce and its applications.
Communication	Communicate commerce concepts and information effectively including in oral, written and visual forms in a cohesive and understandable manner to academic audiences, business professionals and laypersons.

Digital literacy	Use technologies to identify, locate, evaluate, synthesise and disseminate and communicate information in the field of commerce.
Critical thinking	Evaluate and critically analyse academic, professional and business information and values.
Problem solving	Identify solutions to a diverse range of authentic problems in commerce.
Self-management	Take personal responsibility for actions, self-reflect and critique own performance and identify and plan future professional development.
Teamwork	Interact and collaborate with others from a range of disciplines and backgrounds.
Global citizenship	Engage effectively in different environments and contexts reflecting social, sustainable, ethical, economic, and global perspectives in the field of commerce.

Workload/Study Commitment

Trimester and other key dates for the academic year are in the important dates section on the DLI website. Students will on average spend 150 hours for each standard module (15 credit points) undertaking the teaching, learning and assessment activities for this program. You can expect to participate in a range of teaching activities each week. This could include lectures, seminars, practicals and online interaction. You can refer to the individual module details in the program structure for more information. You will also need to study and complete assessment tasks in your own time.

Career Opportunities

Bachelor of Science (Honours) Accounting and Finance – Lancaster University

This program will prepare students for a wide variety of careers in business, with many of our graduates expected to go on and work for the big-four accounting firms, international consulting firms, blue-chip corporations, and global banks and hedge funds.

This program will also equip students with highly desirable transferable skills, which will help graduates find work in the fields of financial customer service, IT support and marketing and communications.

Upon completion, students will be equipped to be able to navigate change, turbulence, and renewal, and make connections with peers and industry professionals. Throughout their studies, students will gain a deep knowledge of their chosen field; they will be able to translate theory into practical skills and, importantly, they will build valuable networks, both academically and professionally.

The overall educational goal of this program is to produce graduates who are able to reflect on and understand the disciplines and practice of accounting and finance and who are equipped with the theoretical and practical skills needed to embark on a career in accounting and finance.

Bachelor of Commerce – Deakin University

Deakin graduates are in demand because they are flexible, proactive, highly engaged, and trained in commercial thinking. As a commerce graduate, you will have the opportunity to enter a professional vertical career that reflects your choice of industry-accredited discipline. These verticals operate in each industry and across government and non-governmental bodies and allow scope and paths for career progression and promotion.
Most importantly, commerce studies equip you with the skills and qualifications that are in demand across all industries. This means your degree will enable you to gain employment within a range of different sectors.

Professional entry level roles for Deakin commerce graduates include:

- Accountant
- Business Analytics Professional
- Economist
- Financial Planner
- Human Resource Manager
- International Trade Officer
- Marketing Manager
- Social and Economic Policy Developer

Work Experience

Work Integrated Learning modules offered in this course provide you with the opportunity to develop your professional networks and work practices while completing your degree.

Program Completion Rules/Program Structure

To complete the Bachelor of Science (Honours) Accounting and Finance/Bachelor of Commerce students must pass 420 Deakin Lancaster Indonesia credit points and meet the following program rules to be eligible to graduate:

DAI001 Academic Integrity and Respect Module (0-credit point compulsory module)
210 credit points of core modules (Deakin)
210 credit points of core modules (Lancaster)
4 Indonesian National Subjects (0-credit points; delivered by Telkom University; mandatory for Indonesian students only)

This is a 3-year undergraduate program. The program takes modules directly from the equivalent Lancaster program and combines them with modules from a Deakin program to create a single, joint study program that satisfies the learning outcomes of both individual programs.
